

GreenTouch™

By Minnesota Touchstone Energy® Cooperatives

Lake Country Power needs volunteers for GreenTouch™

Lake Country Power is calling on volunteers of all ages to lend a “green touch” to Bear Head Lake State Park, at 9301 Bear Head State Park Road, Ely, on **Thursday, May 14, 2026, from 10 a.m. until 2 p.m.**

GreenTouch™ is a statewide cooperative, environmental and community outreach program sponsored by Minnesota’s Touchstone Energy® Cooperatives. Lake Country Power’s goal for the GreenTouch™ program is to enhance the quality and appeal of our state parks within the cooperative’s service area. Secluded in the Northwoods, Bear Head Lake State Park contains pristine lakes and is home to black bears, nesting eagles, wolves and moose. The park was established in 1961 and is located south of the BWCAW.

The volunteer work will be directed by the state park, which may include outdoor activities such as clearing hiking trails, raking leaves and pine needles, collecting litter, cleaning camp sites, gathering downed limbs, and cleaning the shoreline.

Everyone is welcome to participate in GreenTouch™, including youth groups, schools, service clubs and other organizations. You need not be a Lake Country Power member to volunteer. Lunch will be provided for volunteers by the co-op.

If you would like to participate in GreenTouch™, please contact Tami Zaun at Lake Country Power by calling 1-800-421-9959, extension 7152, or e-mail tzaun@lcp.coop. Volunteers do not need a state park vehicle pass on May 14. Please **RSVP by Monday, May 11** to tzaun@lcp.coop.
