

District 4 Director Candidate

Jeff Sheldon

It has been my privilege to represent the members of Lake Country Power District 4 as your board member for the past 2 years. I am seeking reelection for the next 3 years and am asking for your vote.

We've had a couple solid years with no rate increase in 2024 and a small pass-through increase from our wholesale power supplier in 2025. As a board we are using some of the funds from the sale of LCP's subsidiary business to fund a new outpost in Saginaw and a cold storage building at our Cohasset location. These capital improvements are being done without borrowing any money on the members behalf.

Moving forward we will navigate legislative and regulatory changes while our cost of materials, labor and wholesale energy costs have increased.

Experience:

- Certified as a Credentialed Cooperative Director from the NRECA.
- Retired from Lake Country Power with 30 years' experience in energy management.
- Certified Energy Manager & Energy Auditor through the Association of Energy Engineers.
- Current board member of the Itasca Mutual Insurance Company.
- U.S. Army Veteran

Thank you.
