

## **IF YOU PLAN TO USE OUR LOAD MANAGEMENT PROGRAMS**

**\*\*\*\*\* IMPORTANT – PLEASE READ \*\*\*\*\***

**If you plan to install any type of load management equipment (i.e., Off Peak water heating, Off Peak heating, Dual Fuel, Freedom Heating or Interruptible Air Conditioning), please be sure you and/or your contractor have the proper information for installation and control of the program you plan to install.**

**Lake Country Power must have a way to turn on and off or “control” your heat and/or water heating, so you must have your system(s) properly wired to our meter and radio receiver for that control.**

**Please contact us if you have any questions.**

**We have a technician available most mornings from 8:00 a.m. to 12:00 noon to help answer load management wiring/system questions.**

**To access this service, call our toll-free number (800-421-9959) and ask for the Tech Line.**

**Thank you.**
